

CS 591 P1 Assignment 7 SecurityBankATM README

Xueyan Xia (U82450191) Qian Xiang(U96796201)

Feng Jia(U25198302) Kaijie Chen(U81431292)

****Content****

1 Preparation

2 Create the local database

3 How to build the code

4 Running Sample

1 Preparation

1.1 Unzip the file

`$tar tar xvzf file.tar.gz`

e.g.:

`$tar xvzf firsrtname_lastname_SecurityBankATM.tar.gz`

1.2 Description

This assignment includes 4 folders (lib, doc, src, sql) as follows:

~/SecureBank/

~/lib/

~/mysql-connector-java-8.0.18.jar

~/doc/

~/README.pdf

~/DesignDoc.pdf

~/src/

~/JDBC/

~/*.java

~/Models/

~/*.java

~/Views/

~/*.java

~/sql/

~/atm.sql

1.2.1 lib

The lib folder includes mysql-connector-java-8.0.18.jar.

1.2.2 doc

The doc folder includes README.pdf and DesignDoc.pdf.

1.2.3 src

The src folder includes folders JDBC, Models and Views.

1)JDBC

The JDBC folder includes all java files (DB.java and MySQLHelper.java) that are used to connect to the database. All the database configuration is defined in MySQLHelper.java.

2)Models

The Models folder includes all java files(e.g. Account.java, Transaction.java, etc.) that define the model classes used to store the data in the program.

3)Views

The Views folder includes all java files (e.g. LoginWin.java, CustomerWin.java, etc.) that define the view classes for each user interface.

2 Create the local database

2.1 Log in Mysql

This program uses Mysql as the database.

The username and password for the program is configured in the file src/JDBC/MySQLHelper.java.

e.g.:

```
$ mysql -u root -p
```

```
Enter password: *****
```

2.2 Run the script atm.sql

After logging in, run the script atm.sql.

First, create a database, for example, atm;

```
mysql>create database atm;
```

Then, use this database and run our sql.

```
mysql>use atm;
```

```
mysql> source *file_path*/atm.sql
```

*Note: *file_path* is the folder where the script is located.
for example: mysql> source /users/admin/Desktop/atm.sql*

3 How to build the code

1)import jar mysql-connector-java-8.0.18.jar

2)run the main() method in ATM.java.

4 Running Sample

4.1 Predefined available account

Manager Info:

Username: Happy admin Password: money

Customer Info:

Username: Rich man Password: 123456

Username: Poor man Password: 123456

Username: Customer Password: 123456

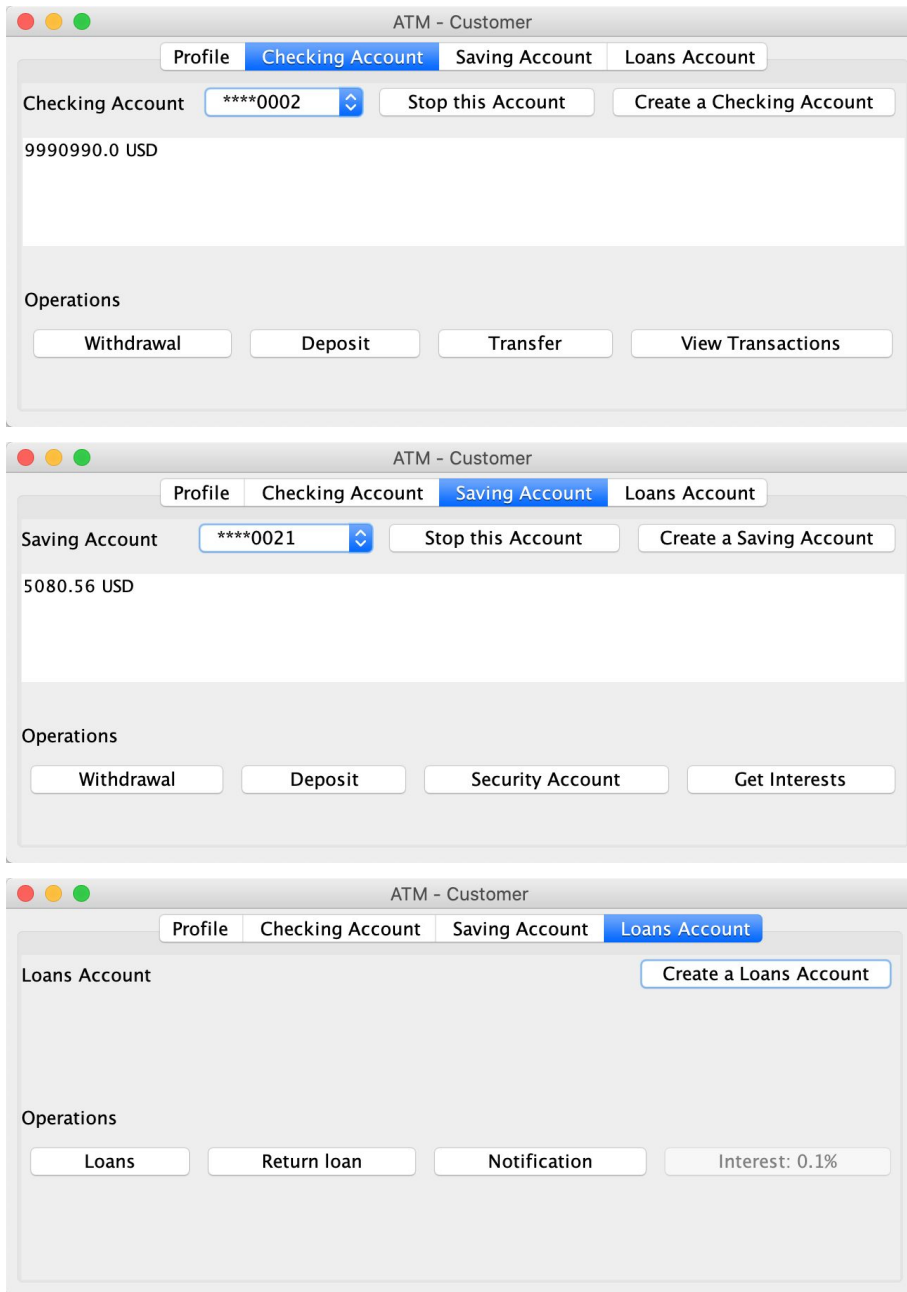

4.2 Sample

1)Login:

2)Customer:

3)Withdrawal/Deposit

Click "Withdrawal" or "Deposit" button to move on to the next window.

ATM - Customer
